**Subject:** Save our Trails

Hello,

I am avid outdoorsman that enjoys the trails that allow us to enjoy and appreciate our beautiful state of California. I am writing in support of a grant request to help save our trails and single track areas. Single track are narrow trails that wind through the great outdoors that are often times invisible unless you are riding on them. They are safe and much needed and will reduce the overuse of the existing 'jeep' trails. We hope to get support to maintain and keep our single track trails which bring families together.

Thank you for your serious consideration and support.

Best Regards,

--
