

2026 (G26) Grants and Cooperative Agreements Program Friends of El Mirage's Preliminary Application Comments

Comments submitted by the Department of Parks and Recreation (Department) Off-Highway Motor Vehicle Recreation (OHMVR) Division to individual Grant Applicants should in no way be construed as a guarantee of successful results for the Applicant within the competitive Grants process or a commitment of funding. Additionally, the lack of comments by the OHMVR Division to any specific Applicant does not ensure successful results for the Applicant within the competitive Grant process or a commitment of funding.

Failure by the Applicant to respond to any OHMVR Division comment of their preliminary Application may be cause for eliminating that item from the Applicant's final Application.

All final Applications will be reviewed by the OHMVR Division. The OHMVR Division may, at its sole discretion, decrease the requested amount and eliminate activities pursuant with regulation Section 4970.07.2 (f)(1-5) and for Law Enforcement Projects, regulation Section 4970.15.3(b)(1-5).

If multiple proposed Projects are requesting funding for the same deliverable, and multiple projects are successful, only one project will receive funding for the deliverable.

For proposed Projects requesting Grant funding for snow and/or winter activities. Applicants must ensure the activities and/or Equipment/Heavy Equipment/Trailer requested are not and/or cannot be funded by the Department's Winter Program (commonly referred to as the Snow Grooming Program).

For proposed Projects requesting Grant funding for the maintenance of roads and/or trails, note that only roads and/or trails that allow "green sticker" Off-Highway Vehicles are allowed to receive Grant funding.

Applicants are reminded that no Grant funds and/or match can be expended, or Project activities conducted in any land owned or managed by the Department except as allowed in the Grants and Cooperative Agreements Program regulations section 4970.09 (b)(11).

General Evaluation Criteria:

- No comment.

Ground Operations: G26-04-11-G01

Project Description – Background

- No comment.

Project Description – Project Description

- No comment.

Project Description – List of Project Deliverables

- #1 – Applicant is reminded that monitoring is not an eligible activity under Project Deliverable #1 should be included under Project Deliverable #7 or Project Deliverable – Other.
- #2 – Applicant must clarify the frequency at which the "course and track" will be maintained. In addition, Applicant is reminded that monitoring is not an eligible activity under Project Deliverable #2 should be included under Project Deliverable #7 or Project Deliverable – Other.
- #3 – Applicant must identify the approximate location(s) and extent of Ground Disturbing Activities expressed in miles and/or acres under this Project Deliverable. The information may be incorporated directly into this section or provided within the "Describe the Size of the Specific Project Area(s) in Acres and/or Miles" section of the Application. In addition, Applicant is reminded that monitoring is not an eligible activity under Project Deliverable #3 should be included under Project Deliverable #7 or Project Deliverable – Other.
- #4 – Applicant must identify the total number of toilets to be pumped under this Project Deliverable and clarify where they are located.
- #6 – Applicant must provide a detailed explanation clarifying the purpose of the proposed boundary fence repair, installation, and/or replacement activities. It is unclear how the scope of this work is distinguishable from Restoration activities intended to remediate unauthorized OHV incursions or user-defined trails in areas not designated for OHV use.

Project Description – All Others

- "Describe the Size of the Specific Project Area(s) in Acres and/or Miles" – Applicant must clarify why the same roads and specific road mileage listed under Project Area 1 in the prior year's Application are being proposed again in the current Application. In addition, it appears that the activity described as "b) 1.0 acres of BLM managed OHV open lake bed..." currently listed under Project Area 1 may be more appropriately located under Project Area 2. Applicant must confirm whether this activity is listed under the correct Project Area and revise the Application accordingly if a correction is needed.

Project Cost Estimate

- Staff #1 "Volunteer Assistance" – The proposed cost for this line item has increased significantly compared to the prior year's Application. Applicant must provide a detailed explanation justifying the increase. In addition, Applicant must incorporate the activity "maintaining the expert 4x4 trails in the Shadow Mountains" into the Project Deliverables and ensure that the specific activities to be performed are clearly defined.

- Contract #1-3 – It is unclear how 100% of these staff position's time is being requested as a direct Project cost. It is generally expected that staff time includes agency-required trainings, administrative tasks, and other non-Project activities that are not directly related to the accomplishment of Project Deliverables. Applicant must carefully review the duties associated with each of these positions and ensure that any costs not directly related to accomplishing Project Deliverables are either moved to the Indirect Cost category or removed from the Application altogether. In addition, for Contract #1 specifically, it is unclear why the full annual salary of the Visitor Center Staff positions is being claimed as a direct Project cost for providing OHV visitor services, given that other user groups are present in the area, including wind surfers and time trial user group(s). As such, it cannot be assumed that 100% of this position's time will be dedicated exclusively to OHV-related activities. Applicant must provide a detailed explanation clarifying what percentage of staff time is dedicated exclusively to OHV-related activities and reduce the associated costs proportionately to reflect only the time directly attributable to the completion of the Project Deliverables.
- Contract #2-4 – Time spent on Project Deliverable 1, 2 and 3 is unclear for this line item. Applicant must clarify within the line item notes what portion of staff time will be specifically dedicated to the maintenance of OHV trails, roads, tracks, and open areas.
- Contract #5 "OHV Trail Monitor" – The proposed quantity of hours for this line item appears excessive relative to the scope of work described in the Project Deliverables. Applicant must provide a detailed explanation justifying the quantity of hours requested and demonstrate that it is reasonable and proportionate to the scope of work outlined in the Project Deliverables, including a clear breakdown of how the quantity of hours was determined. In addition, the activities "monitor the boundary fence for cuts" and "newly installed barriers that protect Joshua tree groves" appear to be Restoration Project Deliverables and are not eligible expenses under a Ground Operations Project, as these activities appear to be associated with remediating damage caused by illegal OHV use. Applicant must provide a clear explanation demonstrating how these activities are directly related to and eligible under the proposed Ground Operations Project
- Contract #7 "Visitor Map - Cartography & Design" – Applicant must remove this line item as it was included in the prior year's Application. Applicant currently has an active Grant under which this line item is included, and any necessary changes or updates to the visitor map should be addressed under that active Project rather than proposed as a new expense in the current Application.
- Materials / Supplies #3 "Straw Bales & Covers" – This line item has been included in the last several years and the repeated purchase of straw bales does not appear to be a sustainable long-term method of delineating the training track. Applicant must clarify whether more permanent delineation solutions, such as Tuff Blocks, have been explored and explain why such alternatives are not being proposed in the current Application. If a more permanent solution is not feasible, Applicant must provide a detailed justification demonstrating why the continued annual purchase of straw bales is necessary and represents the most cost-effective approach to delineating the training track. In addition, Applicant must

clarify whether the proposed costs under this line item include the purchase of additional covers, as referenced in the line item description.

- Materials / Supplies #7 "Road Base – Applicant must further clarify why the unit of measurement quantity matches 2025 numbers. Is it unclear if the Applicant has a plan to purchase the materials based on their Project needs. Applicant must further clarify where the locations of road base will be placed in added in their response. In addition, the line item notes from the prior year's Application stated that the base material would "be used to maintain recent improvements." Applicant must clarify whether this description remains accurate for the current Application year or if the line item notes require revision to accurately reflect the current scope of work proposed under this line item.
- Materials / Supplies #9 "OHV Visitor Map - Printing" – Applicant must remove or reduce this line item to reflect quantities needed for the 18th version of the map, as it is uncertain whether surplus copies remain from the prior year. In addition, Applicant must clarify what percentage of the visitor maps in this line item will be distributed specifically to OHV users during the Project performance period. It is unclear how the Applicant can ensure that non-OHV users, such wind surfers and time trial user group(s) will not also be receiving these maps, as costs must be proportionate to OHV use.
- Equipment Use Expenses #2, 4-10 – It is unclear how the vehicle use fees claimed for these line items do not exceed the Applicant's actual costs. Applicant must provide supporting documentation substantiating the operating and fixed ownership costs for each vehicle listed in these line items.
- Equipment Use Expense #4 "4x4 Auger Truck" – The proposed cost for this line item appears excessive in related to the Project Deliverables. It is unclear why an auger truck is necessary to complete the activities outlined in this Project, as peeler posts are not included in the current Application and only T-posts are proposed. Applicant must provide a clear justification for the inclusion of the auger, a specific breakdown of how the proposed quantity of hours was calculated and demonstrate that both are reasonable and proportionate to and necessary for the completion of the Project Deliverables.
- Equipment Use Expenses #5-7 – The proposed combined quantity of days for these line items appears excessive relative to the scope of work outlined in Contract #4. Specifically, the heavy equipment operator is proposed to work a total of 1040 hours or 130 days on the Project, while the combined total days of Equipment use across these line items is 272 days. It is unclear how a single heavy equipment operator can justify claiming daily use fees on two to three pieces of Equipment for each day worked. Applicant must provide a detailed explanation clarifying how the proposed quantity of Equipment use days was determined for each line item and demonstrate that the combined total is reasonable and proportionate to the heavy equipment operator's proposed schedule, or reduce the associated costs to an amount that accurately reflects and aligns with the scope of work outlined in the Project Deliverables.
- Others #1 & 2 – Applicant must clarify what percentage of lake bed use is attributable to non-OHV users. It is unclear why the full cost of these line items are being claimed as an OHV Grant expense when other user groups also utilize

the area. Applicant must ensure that the costs claimed under in the line items are proportionate to the percentage of use attributable to OHV Recreation and reduce the associated costs accordingly.

- Indirect Costs #2 "Administration" – The proposed line item total is inconsistent with the information provided in the line item notes. Applicant has stated that the staff member works on the Grant for 20 hours per month, however, the line item total reflects a claim of 50 hours per month. Applicant must revise the line item total to accurately reflect the quantity of hours stated in the line item notes or provide a detailed explanation justifying the discrepancy between the hours described in the line item notes and the hours claimed in the line item total. In addition, it is unclear how the costs proposed under this line item are not duplicative of the administration costs being incurred by IMC under the Contract line items. Applicant must provide a detailed explanation clearly differentiating the specific responsibilities and scope of work attributed to IMC under the Contract line items from those proposed under this line item and demonstrate that the associated costs are not being claimed under both categories.
- Indirect Costs #5 "GIS & Data Management" – It is unclear why "pays for costs including all project before/after photos" is included in this line item, as before/after photos are generally document by the field crew. Applicant must provide a detailed explanation clarifying how this activity falls within the scope of this line item and demonstrate that the associated costs are not duplicative of direct field crew duties already included elsewhere in the Application.

Restoration: G26-04-11-R01

Project Description – Background

- No comment.

Project Description – Project Description

- The G26 Project Area appears potentially duplicative of the Applicant's G23 Restoration Project, which also remains active through December 2026. Applicant must clarify how the G26 Project Area is geographically distinct and identify the methodology used to ensure that no restoration sites, monitoring zones, or costs overlap with those funded under G23. Applicant must remove language and any cost associated with this activity from the Project if there is duplication of services.

Project Description – List of Project Deliverables

- #1 – It is unclear what the size of the actual active restoration area will be. Applicant must verify the accuracy of this figure or provide a revised estimate that reflects the appropriate level of active restoration associated with illegal OHV incursion. In addition, Applicant must also separately identify any areas representing anticipated future incursions and provide distinct estimates for each. Furthermore, the statement, "Installation of erosion control features such as

rolling dips, wattles, and water bars” appears to be Ground Operations activities rather than Restoration activities. Applicant must either provide additional information demonstrating how these activities meet Restoration grant criteria or remove all Ground Operations-related language and associated costs from the Project budget and scope of work.

- #2 – Applicants must provide the anticipated number of monitoring efforts for each Project Area listed under Section D: “Size of the Specific Project Area(s)...”.
- #4 – Applicants must provide a clear estimate of the mileage, linear feet, or other applicable measurements of fencing and/or barriers required for the Project.
- #5 – The Deliverable appears to describe Ground Operations activities rather than Restoration activities. Applicant must provide additional information demonstrating how these activities meet Restoration grant criteria, as well as identify the locations where public outreach and visitor services efforts will occur. If these activities are determined to be duplicative, Applicant must remove all associated language and costs from the Project budget and scope of work.

Project Description – All Others

- Attachments: Applicant is reminded to include Project-Specific Map(s) with sufficient detail for someone unfamiliar with the area to locate the Project site(s). The map(s) must also include valid GPS coordinates for all Project site locations. Additionally, Applicant may include map keys identifying active restoration areas, fencing/barriers, and other relevant Project features.
- (C) How the proposed Project relates to OHV Recreation... – Applicant must provide additional information on how the Project relates to OHV recreation and how OHV recreation specifically caused the damage proposed for restoration. In addition, “Restoring linear disturbances better confines OHV travel to the legal, designated route network” appears to be Ground Operations activities rather than Restoration activities. Applicant must either provide additional information demonstrating how these activities meet Restoration grant criteria or remove all Ground Operations-related language and associated costs from the Project budget and scope of work.
- (D) The size of the specific Project Area(s) in acres and/or miles – It is unclear what the total size is of the areas proposed for monitoring and patrolling, including both the active restoration sites under this Project and any additional areas such as newly fenced sites. Applicant must identify the location and acreage and/or miles of all areas that will require monitoring or patrolling upon completion of restoration work and must separately identify the size and location of any additional areas outside these restoration sites, including past restoration areas and any newly proposed areas vulnerable to OHV incursions.
- (E) Except for scientific and cultural studies or planning Projects, describe the monitoring... – Applicant must clarify whether aerial imagery monitoring has already been conducted using the GIS database and BLM protocol, or if this capability is intended for future monitoring activities. In addition, this activity is not included in Project Deliverables or the Project Cost Estimate. Applicant must

explain how aerial imagery monitoring aligns with the approved scope of work and identify any associated costs, if applicable.

- (l) Except for scientific and cultural studies or planning Projects, erosion control efforts ... – Applicant must clarify the reference to “revegetating the area,” as this activity is not included in the Project Deliverables or the Project Cost Estimate. Applicant must explain how revegetation aligns with the approved scope of work and identify any associated costs, if applicable. In addition, Applicant must provide further information demonstrating how the proposed revegetation efforts will be effective within a desert environment.

Project Cost Estimate

- Contracts #1 “Crew Lead” – It is unclear what the hour breakdown is for the line item. Applicant must provide a detailed breakdown for each year.
- Contracts #2 “Restoration Crew” – It is unclear whether the hour breakdown provided corresponds to the staffing line item. Applicant must provide a detailed, year-by-year breakdown of hours to clarify how the totals were calculated. In addition, the percentage of staff time allocated to Project Deliverables is unclear. Applicant must clarify what portion of the staff member’s time will be dedicated to active restoration, monitoring, signage, fencing/barriers, public outreach, and other relevant restoration activities. Furthermore, the activity described as “updating entrance kiosks with current OHV trail maps and QR codes to mobile trail apps” appears to be an indirect activity, as it does not directly relate to the completion of the Project or to Restoration activities. Applicant must explain how this activity directly supports the proposed Project. If the activity is not directly tied to Project deliverables, Applicant must either remove this language entirely or relocate both the description and the associated costs to the Indirect Cost category.
- Contracts #3 “Trail Monitor (1)” – It is unclear whether the hour breakdown provided corresponds to the staffing line item. Applicant must provide a detailed, year-by-year breakdown of hours to clarify how the totals were calculated. In addition, the “Quantity” (QTY) listed in the staffing line item reflects a significant increase compared to the G23 Restoration Project. Applicant must provide additional justification explaining the reason for the increased QTY.
- Contracts #5 “Archeologist” – It is unclear whether the hour breakdown provided corresponds to the staffing line item. Applicant must provide a detailed, year-by-year breakdown of hours to clarify how the totals were calculated. In addition, the “Quantity” (QTY) listed in the staffing line item reflects a significant increase compared to the G23 Restoration Project and seems excessive. Applicant must provide additional justification explaining the reason for the increased QTY.
- Materials / Supplies #4 “Hand Tools” – The line item reflects a significant increase compared to the G23 Restoration Project and appears excessive. Applicant must provide additional justification explaining the reason for the increased QTY and include a detailed cost breakdown. In addition, Applicant must clarify the necessity of purchasing a “one man auger” when the budget also includes an auger truck and a separate purchase of a two-man auger. Applicant must explain

the distinct purpose of the one-man auger and how it will be used to support the proposed Project.

- Materials / Supplies #5 “Fuel for Hand Tools” – Applicant must list the specific hand tools for which the gasoline is intended to be used for this Project.
- Equipment Use Expenses #1 “4x4 Vehicles - Mileage” – Applicant must separate transporting miles from operating miles into two separate line items. Transporting miles apply only to travel between the vehicle yard and the Project site, while operating miles apply only to mileage accrued while performing Project activities within the Project area. Applicant must provide a revised breakdown that clearly identifies total transportation and operation miles per day for each vehicle included in this line item. In addition, Applicant must provide a more detailed description of what "Operations activities" entail.
- Equipment Use Expenses #2 “4x4 Vehicles - Vehicle Use Operations” – The percentage of vehicle usage allocated to Project Deliverables is unclear. Applicant must clarify what portion of each vehicle will be dedicated to active restoration, monitoring, signage, fencing/barriers, public outreach, and other relevant restoration activities. In addition, personnel transportation expenses are reimbursed solely through the approved per-mile rate. Applicant must remove any language or costs associated with separate transportation charges. In addition, Applicants notes are inaccurate and need to be revised. The line-item rate and total must match the narrative of the \$115 daily rate.
- Equipment Use Expenses #3 “Auger Truck” – It is unclear why an auger truck is required for this Project, particularly since the Applicant states that the “project area is remote and much restoration will be performed manually,” and several restoration techniques can be completed without the use of an auger. Applicant must provide additional justification explaining why an auger truck is necessary, how it will be used within the Project scope, and why manual or alternative methods are insufficient. Applicant must also clarify the need for this auger truck in relation to the additional requests for a one-man auger and a two-man auger. Furthermore, the number of days budgeted for this activity appears excessive based on the quantity of posts being purchased for this Project. Applicant must provide additional justification explaining why the number of days requested is necessary and how the estimated duration aligns with the actual scope of work.
- Equipment Use Expenses #4 “Heavy Equip Fuel” – Applicant must clarify whether the fuel request covers the truck, the auger, or both. It is also unclear whether the auger is a standalone powered unit or if it requires power from the truck’s engine, hydraulic system, or its own separate fuel source.
- Others #1 “2 Person Auger” – Applicant must clarify the need to purchase a new two-man auger, as a similar auger was funded under the G23 Project for installing and maintaining approximately 2–5 miles of fencing/barriers. Applicant must explain why the previously purchased auger cannot be used for this Project. Applicant must also clarify the need for this specific two-man auger in relation to the additional requests for a one-man auger and the use of an auger truck.

Education and Safety: G26-04-11-S01

Project Description – Background

- No comment.

Project Description – Project Description

- No comment.

Project Description – List of Project Deliverables

- #2 – “Social media campaign...” and “Website will report...” is not supported by the Project Description. Applicant must revise the Project Description or remove the activity. In addition, Applicant must specify which social media platforms that will be utilized and provide the links of where the messages will be posted.

Project Description – All Others

- No comment.

Project Cost Estimate

- Staff #1 “Volunteer Assistance” – Applicant must clarify how the ‘Southern California Timing Association (SCTA)’ contributes, as “will large permitted events” is unclear. In addition, please clarify if the permitted events will be open to the public.
- Contracts #1 “OHV Visitor Education Rep” – Applicant must clarify how these duties will not overlap with the duties of the G26 Ground Operations “Contracts #1 – OHV Visitor Center Staff” and percentage of OHV-specific visitor contacts.
- Contracts #2 “Social Media Campaign” – Applicant must clarify QTY of social media and educational campaign as Applicant’s current social media does not appear to reflect this ongoing QTY or messaging. In addition, Applicant must specify which social media platforms that will be utilized and provide the links of where the messages will be posted.
- Materials / Supplies #1 “Lakebed Safety Rules” –Applicant must clarify whether the OHV Visitor Maps requested in the G26 Ground Operations Application are different from the brochures in this line item.
- Materials / Supplies #2 “Safety Equipment” – Applicant must clarify the need for additional safety equipment, as this line item was requested within the G25 Application. In addition, Applicant shall clarify the quantity being requested, as it is unclear whether or not two (2) vests are being requested, or two (2) of each item.
- Equipment Use Expenses #1 “Vehicle Mileage – Education Rep” – Applicant must clarify what “perform Operations Activities” entails as it is unclear if this is an Education activity.

- Equipment Use Expenses #2 “4x4 Pickup Truck” – Applicant must clarify what “educational activities” will be performed by the Educational Representative while using the truck.
- Equipment Use Expenses #2-3 – Applicant must revise the notes, as this Project does not include a Project Deliverable #4.
- Indirect Costs #1 “Uniform” – Applicant must justify the need for an additional uniform, as this line item was requested within the G25 Project.
- Indirect Costs #2 “Administrative / Supervision” – Applicant must provide a clear explanation of how the cost was determined, including the precise scope and amount of work to be conducted. For any Staff positions included in this line item, Applicant must utilize the hourly rate and quantity of hours as the unit of measure to clearly demonstrate how the associated costs were calculated. If helpful, Applicant may break this line item out into multiple Indirect Cost line items to clearly identify and separate the various costs.

Education and Safety: G26-04-11-S02

Project Description – Background

- No comment.

Project Description – Project Description

- Applicant must clarify if the Ocotillo map is the Ocotillo Wells SVRA. If so the inclusion and any associated costs must be removed from the Application.
- Applicant must clarify the mobile applications that the maps will be available for use.

Project Description – List of Project Deliverables

- #1 – Applicant shall move this Deliverable to Project Deliverable #3. In addition, Applicant must clarify if the maps will be distributed for free. Lastly, Applicant must also update “Ocotillo” to clarify the map they are referring to.

Project Description – All Others

- Location where training/services will be conducted – Applicant must provide a clearly defined and accurate estimate of where the field testing will occur to align with the Project Cost Estimate.

Project Cost Estimate

- Staff #1 “BLM Resource Staff” – Applicant must clarify the title of the staff member and the GS/WG level.
- Staff #2 “BLM GIS” – Applicant must update the narrative to include the GS/WG levels for each staff member.
- Staff #3 “BLM Management” – Applicant shall clarify the hours being requested, as the combined hours of Staff #1 & #2 is 20 hours. It is unclear why an

additional 20 hours of oversight would be required. In addition, Applicant must update the narrative to include the GS/WG levels for each staff member.

- Staff #4 “FOEM Project Manager” – QTY appears excessive. Applicant must provide the methodology for the QTY of hours being requested.
- Contracts #1 “Cartography and Design” – Applicant must update the narrative to indicate the contractor. In addition, Applicant must provide the methodology to support the QTY and Rate.
- Contracts #2 “Mobile Maps” – Applicant shall provide the methodology to support the QTY and Rate. In addition, applicant shall revise the narrative to indicate which applications the maps will be provided to. Lastly, Applicant shall revise the narrative to indicate the contractor.
- Equipment Use Expenses #2 “4x4 Vehicle - Mileage” – Applicant shall update the unit of measure (UOM) to mileage (MI). In addition, Applicant shall revise the narrative to indicate the activity differences in ‘Transportation’ and ‘Operations’ mileage. If the activities are different than Applicant must create separate line items. Applicant is reminded that Equipment operation is limited to 150 miles per day as a direct cost, with the remaining cost as match and Equipment transportation is limited to 100 miles per day as a direct cost, with the remaining cost as match.

Education and Safety: G26-04-11-S03

Project Description – Background

- No comment.

Project Description – Project Description

- It is unclear how Friends of Jawbone and the Specialty Equipment Marketing Association (SEMA) will be involved in this Project and what they will contribute. Applicant shall provide additional details to clarify the duties and need for the partners.

Project Description – List of Project Deliverables

- #1 – Applicant shall provide additional information to support how these trainings differ from free, publicly available, video programs such as the Recreational Off-Highway Vehicle Association (ROHVA) and/or the G24 Friends of Jawbone SxS Safety Education training. In addition, Applicant needs to clarify the training location of Jawbone Station Visitor Center as the “Location where training/services” section indicates the El Mirage Visitor Center.
- #9 – Applicant must specify which social media platforms that will be utilized and provide the links of where the messages will be posted.

Project Description – All Others

- Location where training/services will be conducted – Applicant needs to further clarify the location of training and services as “in the field” is unclear.

Project Cost Estimate

- Staff #1 “Project Manager” – Applicant shall provide additional details to specify the types of activities the project manager will complete.
- Contracts #1 “Video Production” –Applicant must provide additional details to support how the cost was determined. In addition, Applicant shall revise the narrative to indicate the contractor.
- Contracts #2 “Website Design and Construction” – Applicant must provide additional details to support how the cost was determined. In addition, Applicant shall revise the narrative to indicate the contractor.
- Contracts #3 “Internet Course Setup” –Applicant must provide additional details to support how the cost was determined. In addition, Applicant shall revise the narrative to indicate the contractor.
- Contracts #4 “Social Media Campaign” – Applicant must specify which social media platforms that will be utilized and provide the links of where the messages will be posted. In addition, Applicant shall revise the narrative to indicate the contractor.
- Contracts #5 “Graphic Designer” – Applicant must specify the type of content to be developed as part of the posters, flyers, and booklets. In addition, Applicant shall revise the narrative to indicate the contractor.
- Equipment Use Expenses All Line Items – Applicant must provide additional details to support the need for Equipment use as the Project is primarily for the development of online and/or electronic content. In addition, vehicle usage for attending meetings is an indirect activity.
